SUMMARY

Innovative product creator and developer with extensive experience in building Flutter/Android applications and multilingual websites. Proven ability to develop AI-assisted workflows, connect label images to structured results using Gemini and Python, and organize evidence-linked information across multiple languages. Skilled in technical implementation, support, and diagnostics, with a strong focus on documentation and quality assurance. Eager to leverage these skills to drive product innovation and enhance user experience for your company.

WORK EXPERIENCE

Product creator & developer, BOTIA, Netherlands

2025 – Present

- Engineered a Flutter/Android application and a public multilingual website, culminating in a product available via Google Play.
- Developed a workflow that integrates label images with structured results by employing Gemini-based text extraction, a deterministic Python rules engine, and a Google Cloud Function.
- Orchestrated evidence-linked ingredient information and editorial criteria across 14 languages, documenting 129 ingredient records and controlled terminology in the public web repository.
- Established connections between results and explanatory web content, while maintaining testing, documentation, and information-quality workflows, including explicit management of uncertainty.

Technical implementation & support, Lanaldén, S.A., VItoria, spain

2022 – 2024

- Executed the implementation and provided operational support for TicketBAI fiscal reporting systems for business clients.
- Investigated incidents impacting connectivity and data transmission, collaborating with technical teams to devise practical resolutions.
- Authored technical procedures, support documentation, and internal guidance to facilitate repeatable troubleshooting processes.

Systems & connectivity specialist, Zelenza — public-sector projects, vitoria, spain

2018 – 2022

- Diagnosed complex connectivity, access, and device issues within facilities such as hospitals and universities.
- Facilitated equipment deployment, managed Windows environments, oversaw user access, and coordinated with telecommunications and technical teams.

Digital product & AI evaluation, Project-based assignments, madrid, spain

2020 – Present

- Executed comprehensive software and digital-product testing, pinpointed reproducible errors, and documented quality observations.
- Performed AI-output review, semantic annotation, and data-quality tasks in adherence to specified evaluation criteria.

EDUCATION

Universidad Autonoma Madrid, psychology, Madrid, Spain

09/1992 – 07/1998
